ORBITAL WELDING CLOSED HEADS

ORBITAL CUTTING AND FACING

ORBITAL WELDING

www.AXXAIR.com

Orbital welding (Closed heads)

INNOVATIVE ORBITAL SOLUTIONS

Our new range of closed SATFX welding heads enables you to achieve high quality welds in a minimal space.

Orbital welding with a closed head is done by a **simple fusion without additional wire feeding.** Consequently, these heads are recommended for welding **thin tubes of many types of stainless steel** with thicknesses of less than 3 mm.

SATFX heads are also indispensable for welding other nickel or titanium based alloys which are very sensitive to oxidation and are used when an installation with an impeccable resistance to chemicals or heat is required.

The new SATFX heads have been designed to meet the needs of our customers who are often confronted with the most demanding welding specifications.

The protective atmosphere provided by the closed heads permits welding in an inerting chamber. This results in welds with very minimal discoloration and perfectly clean weld beads.

This type of equipment is used in **industrial** sectors sensitive to hygienic conditions such

as aeronautics, semi-conductors, pharmaceuticals as well as food and beverage processing.

The narrow width of the head makes it ideal for construction sites where only a small amount of straight sections are in demand. However, these welding heads are also used in workshops and clean rooms.

The SATFX range, coupled with our SAXX welding power supplies and their continuous monitoring of welding parameters, guarantee **repeatable welds of high quality**. This type of weld passes the most strenuous tests, such as X-ray inspection.

FLEXIBILITY, PRODUCTIVITY

Productivity remains our top priority. The liquid cooling circuit has been optimized to allow for greater heat evacuation and thus:

increases the service life of the SATFX
guarantees a substantial welding output. The operating current at 100% is **100 A.**

QUALITY AND REPEATABILITY

Direct wire feeding and a homogeneous diffusion of the inert gas, high quality materials and special component processing, a grease-free operation, easy maintenance and cleaning plus numerous configurations make the SATFX range the ideal response to the requirements of high-tech industries.

They allow for intense, versatile and long-lasting usage on your construction sites and in your workshops.

INNOVATION : GLOBAL PROCESS 2 in 1

The SATFX closed welding heads can easily be

transformed into a cassette machine. The cassette allows for easy placement on the parts to be welded in confined areas. Welding without tacking is possible under certain conditions.*

Please do not hesitate to contact us for all enquiries relating to orbital welding technology.

We will be glad to share our knowhow with you and to devise a solution that best meets your needs!

V3.2 - 03/2022

SATFX-52 - 76 - 115

High protection against arcing outside the electrode

Power drive system with encoder: allows starting in all angular positions of the electrode

Water cooling of the electrode holder and aluminium flanges.

Standard stainless steel jaws for quick assembly without

tools.

Wide aluminium jaws for optimal machine stability when welding accessories.

Illuminated logo on each side

Operating without grease: compatible with clean room standards.

Length of the cable: 8 meters

Global Process: 2 in 1

Cassettes for welding in confined areas.

Easy positioning of the cassette on the parts to be welded before fixing the central body of the head.

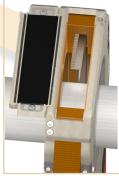

These heads are delivered in a water- and dustproof suitcase and with a suspension assembly.

AXXAIR

Large pivoting window with welding glass to check the electrode alignment after tightening the two frames.

The welding glass (shade10) allows to observe the weld and protect the operator's eyes.

Closing system with adjustable force without tools. Allows precise adjustment of the force of the jaws on the tube to be welded and helps opening after welding.

Perfect gas protection in the welding head.

Optimized handling: Ergonomic design with soft touch compound areas and overall weight greatly reduced.

4 stainless steel remote control buttons.

XXX INNOVATIVE ORBITAL SOLUTIONS

SATFX-52 - 76 - 115

Technical characteristics:

Maximum welding current	150 A
100% duty cycle	100 A

These closed heads are designed for orbital butt TIG welding of tubes, tubes-elbows, tube-ferrules, tubes-T, tubes-fittings and others in a fully inerted closed chamber.

The SATFX heads are driven by the AXXAIR orbital welding power sources of the SAXX range.

Integral water cooling of the heads and new treatment of the aluminium parts offering a better electrical and thermal conductivity.

The double cooling of the rotor and the head body is essential to guarantee a good lifespan of the parts by minimizing the effects of expansion deformation.

Illuminated logo on each side of the head : it allows to visualize if the power source is turned on or off and if the machine is in a welding cycle or not.

When the power source is powered on and the head connected, the light is on steady. When the machine is welding, the indicator light flashes.

4 stainless steel remote control buttons: Start/stop, gas purging, rotation of the rotor in one direction and rotation in the other direction.

Regardless of the starting position during welding, the rotor automatically returns to the open position of the rotor so that the welded parts can be removed easily.

Ergonomic design:

Ergonomic handle with soft touch overmolding that brings the hand closer to the center of gravity of the head, providing unparalleled handling comfort.

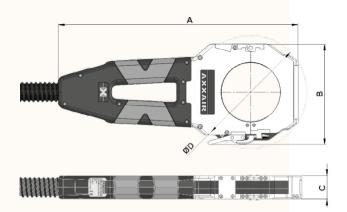

Maintenance :

All rotation axes and toggle clamps can easily be changed.

Cleaning: A single hexagonal wrench allows the machine to be disassembled in a few minutes to clean the interior, without having to empty the head's coolant circuit.

Gas diffusion: more direct gas supply through two sintered bronze semi-circular bunds. This allows a trouble-free distribution and flow, even with a high gas flow rate and without blowing out the arc. Max flow rate: 60l/min

Thickness of 37.6 mm: possibility to weld with the stainless steel jaws standard microfitting fittings or other accessories with a straight part of 19.1 mm.

INNOVATIVE ORBITAL SOLUTIONS

Orbital welding (Closed heads) - Accessories Cassettes

Global Process 2 in 1

These cassettes are intended to be mounted on the closed welding heads of the SATFX range. They allow the operator to perform welds in a cramped and restrictive environment, where it is difficult to operate these welding machines.

When the cassette is in place on the tubes or accessories to be welded, the operator only has to fix the machine body in the cassette and then start the welding program from the power supply or from the welding head's keyboard.

Flexibility: The SATFX heads can be quickly converted to cassette machines and vice versa.

Please note that the cassettes can be ordered later on.

Thin and wide clamping jaws can be used.

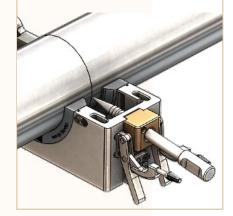

Interface to be fixed on the welding head.

Cassette clamping lever on machine.

Positioning pen for placing the cassette on two tubes or accessories in line, already tacked.

The tip of the pen represents the tip of the electrode.

The cassettes benefit from the same closing system with adjustable force without tools that allows precise adjustment of the jaw force on the tube to be welded and assists opening after welding.

V3.2 - 03/2022

INNOVATIVE OBBITAL SOLUTIONS

Orbital welding (Closed heads) - Accessories

In order to fit various configurations of parts to be welded, AXXAIR offers flanges with a perfect shape for your elbows.

The use of these elbow flanges allows an optimized gas protection while avoiding the use of tape and the cleaning of the elbow after welding.

Use with SATFX 52 - 76 - 115

Support jaws

Elbow flanges

For welding your elbow-tube with a closed head, you will need:

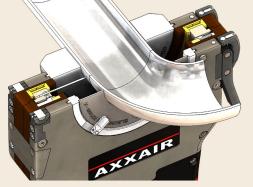

- the specific elbow flange support jaws (2 halfshells) for your machine

- Elbow flanges (2 half-shells) for each outer diameter and radius of your elbow to be welded

The use of the SSEDX offset electrode support may be required depending on the configuration of the elbow to be welded (in the following product code table, the SSEDX column shows whether the accessories is needed or not).

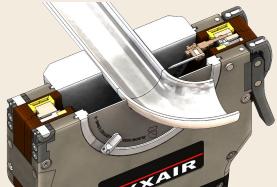

Standard configuration

Welding axis aligned with the machine

Configuration with offset electrode holder required

Offset welding axis with regards to the machine/head

See the following «accessories» part for more details on the SSEDX offset electrode holder.

V3.2 - 03/2022

Orbital welding (Closed heads) - Accessories

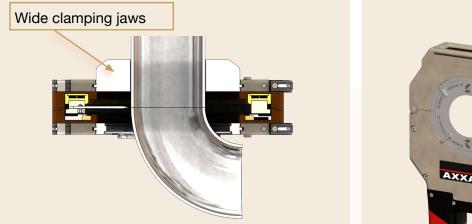

INNOVATIVE ORBITAL SOLUTIONS

Tube end

It is recommended to use wide clamping jaws (2 half-shells) to ensure a better hold of the closed head on the tube-elbow to be welded and already tacked.

Elbow end

The elbow flanges rotate in order to give flexibility and to fit perfectly your different configurations and welding postures.

Elbow flange support, thickness 10.6 mm, stainless steel

Join experience

A set of elbow flange support jaws is made of 2 thin half-shells.

For Machine	Product Code	Net Weight	Packaging (plastic)
SATFX-52	SMN052-SFLAX	0.088 kg	10 x 10 x 2.5 cm

Orbital welding (Closed heads) - Accessories

INNOVATIVE ORBITAL SOLUTIONS

Product Code	Description	Net weight	Dimensions	
SSEDX	Offset electrode support	0.008 kg	150 x 210 mm	
Remote electrode holder for ø1.6 mm and ø2.4mm electrodes:				

The SSEDX accessory allows a lateral displacement of 2 to 6.5mm from the original position which allows for the welding of short elbows for example.

If you use this system, the usable diameter range of the tube is reduced:

✓ SATFX-52

Machine	ø min	ø max
SATFX-52	6 mm	43 mm
SATFX-76	6 mm	67 mm
SATFX-115	12 mm	107 mm

See cosumables to find the electrodes required for its use.

Product Code	Description	Net weight	Dimensions	
SSEIX	Inclined electrode holder	0.015 kg	150 x 210 mm	
Inclined electrode holder for ø1.6 mm and ø2.4mm electrodes:				

The SSEIX accessory allows the electrode to be tilted from 0 ° to 45°, which makes it possible to produce angle welds (flange welds or other accessories).

If you use this system, the usable diameter range of the tube is reduced:

Machine	ø min	ø max
SATFX-52	6 mm	28 mm
SATFX-76	6 mm	52 mm
SATFX-115	12 mm	92 mm

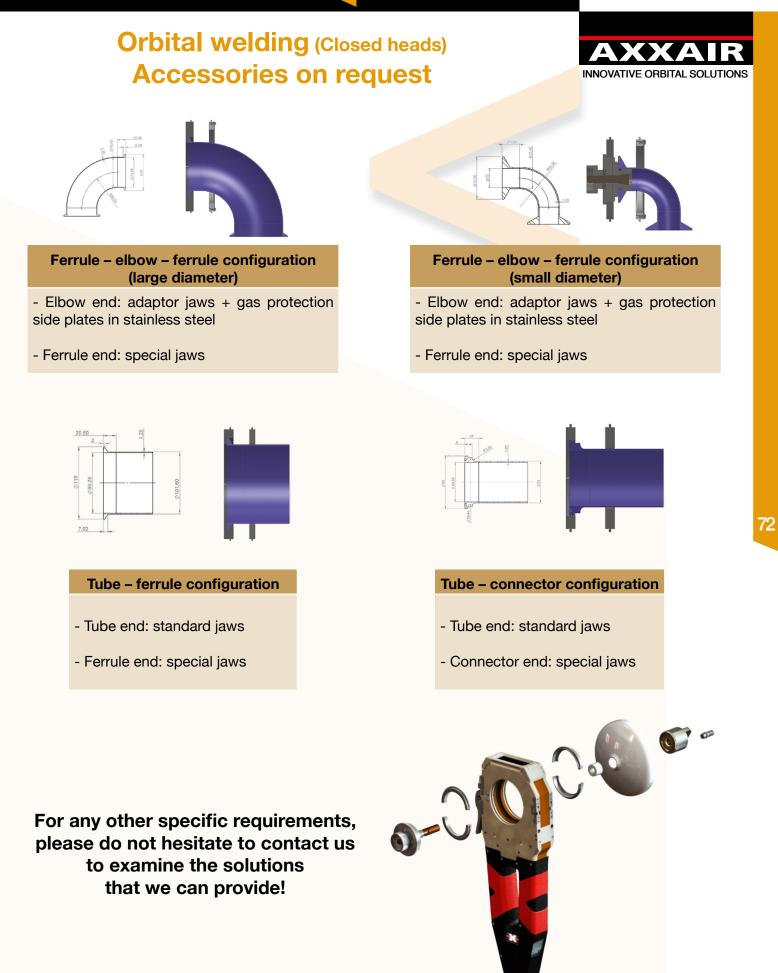

See cosumables to find the electrodes required for its use.

Orbital welding (Closed heads) - **Consumables**

Our electrodes are specifically sharpened to 20° with a flat. This increases the service life of the electrodes.

We offer pre-cut electrodes to cover the entire clamping range of the head without damaging the rotary system. The electrode must be selected according to the outer diameter of the tube to be welded.
